

SUMONA SHARMIN ISRAT

AI/ML Engineer — Fresher | Aspiring AI Evaluation & Prompt Testing Specialist

Dhaka, Bangladesh | +880 1533-636409 | sumona.bd81@gmail.com

PROFESSIONAL SUMMARY

Recent CSE graduate from East West University, now pursuing an MSc in Artificial Intelligence & Machine Learning at the same institution. Background in deep learning and computer vision through academic projects, including a paper accepted at ICCIT 2025 on self-supervised classification. Comfortable working hands-on with neural network models and currently building practical skills in prompt engineering and AI agent testing through an ongoing course. Particularly drawn to the evaluation side of AI — going through outputs to catch errors, inconsistencies, or unsafe assumptions — and enjoys the kind of close, methodical analysis that this work requires.

TECHNICAL SKILLS

Programming: Python, C, Java, SQL

AI / Machine Learning: Supervised & Self-Supervised Learning, CNNs, Model Evaluation & Benchmarking

Deep Learning Frameworks: PyTorch, TensorFlow (basic)

Generative AI & Agents: Prompt Engineering, AI Agent Design & Testing, RAG & Vector Databases, MCP (Model Context Protocol), API Integration & Webhooks

GenAI Tools: Claude, Claude Code, ChatGPT, n8n (workflow automation)

Tools & Technologies: Git, NumPy, OpenCV, Scikit-learn, Flask, HTML/CSS

EDUCATION

MSc in Artificial Intelligence & Machine Learning — *In Progress*

East West University, Dhaka

B.Sc. in Computer Science and Engineering — *January 2022 – December 2025*

East West University, Dhaka

Higher Secondary Certificate (Science) — *2018 – 2020*

Dhaka Cantt Girls' Public School & College

CERTIFICATIONS & ONGOING TRAINING

AI Agent Development — Ostad

- Currently enrolled; covering AI agent fundamentals, prompt engineering, RAG & vector databases, API/webhook integration, and multi-agent system design.
- Hands-on practice evaluating and debugging AI agent workflows using Claude, Claude Code, and n8n across real-world automation projects.
- Includes a dedicated module on model context protocol (MCP), tool calling, and production-grade AI system monitoring and testing.

PUBLICATIONS

Freshwater Fish Species Classification Using Self-Supervised Learning

Accepted at International Conference on Computer and Information Technology (ICCIT 2025)

- A self-supervised representation learning framework to classify freshwater fish species using limited labeled data.

ACADEMIC PROJECTS

Vision-Based Self-Supervised Learning for Malware Detection

Final Year Project

- Designed a malware detection system by converting malware binaries into grayscale images and applying self-supervised contrastive learning to learn robust feature representations without manual labels.

- Evaluated model outputs across multiple malware families, systematically analyzing misclassifications and edge cases to improve generalization.
- Built and tested a Flask-based web application for real-time malware analysis, including manual verification of prediction accuracy.

CORE STRENGTHS

- Strong analytical and structured thinking, with high attention to detail — well-suited to identifying inconsistencies and unexpected behavior in AI outputs.
- Solid grounding in computer vision and visual data analysis, with practical exposure to model evaluation and benchmarking.
- Proficient in English speaking and writing, with experience in research-oriented paper writing and academic/technical documentation.
- Effective project planning, organized reporting, and collaborative teamwork.

RESEARCH INTERESTS

NLP, Computer Vision, Large Language Models, Representation Learning, Generative AI, Applied AI Systems & Evaluation
